Presented by Ms. Anitha Mercy for the senior MYP and DP Students

After two decades of building impactful products and teams at **Google, Meta, and founding the AI startup Noosh.ai, Ms Anitha Mercy** transitioned her career focus towards enabling students and professionals to thrive in the AI era.

This session at HUS was driven by a spirit of sharing, curiosity, and equipping the next generation with the tools and mindset needed to navigate the future of work. The goals of the session were

1. To **inspire curiosity around AI** and its implications for the future of work.
2. To equip **students with practical tools** and mindset shifts to help them take ownership of their paths in an AI driven world.
